MARC C. JOHANSEN

Director, Space & Intelligence Programs
Washington DC Operations

Network and Space Systems

Marc Johansen serves as the Director, Space & Intelligence Programs – Washington DC Operations. In this capacity, he represents Boeing to the federal government for both civil and national security launch and satellite programs. He also supports Boeing commercial and international space programs.

Marc joined Hughes Space and Communications (now Boeing S&IS) in September 1998. His career includes 24 years in Government space operations, acquisition, and policy. He previously served as the Assistant Deputy Under Secretary of Defense (Space Acquisition and Management), in the office of the Under Secretary of Defense for Acquisition and Technology. The space acquisition office was responsible for oversight for national security space policy, planning, architectures, and acquisition and management.

From 1992 to 1995 Colonel Johansen was assigned to the Executive Office of the President; first as the Director of Space Operations on the National Space Council; then to the President's Science Advisor and National Security Council, as the Assistant for Space and Command, Control, Communications and Intelligence.

Prior to his White House assignment, he was the deputy Chief of the Weapons Division in Air Force Legislative Liaison. There he was responsible for interfacing with Congress on all Air Force weapons programs. During a tour in Korea, from 1987 to 1989, Colonel Johansen was the Commander of the deep space surveillance unit at Taegu. He was named U.S. Space Command's leader of the year, and the unit became the first of its type to receive an overall excellent rating. He has had various space operations and acquisition assignments including

Senior Director at the Defense Support Program ground station and Crew Commander at the Ballistic Missile Early Warning System in Greenland.

Marc is a graduate of the National War College with an MS in National Security Strategy; Creighton University, with an MS in Atmospheric Sciences; and the Air Force Academy (1974). In August 2000 he attended the Harvard University Program for Senior Executives in National Security. He also attended the UCLA Leadership Program and Boeing Executive Programs in 2001 and 2003. Marc Johansen's awards and decorations included the Defense Superior Service Medal, the Presidential Service Certificate, the Master Space Badge, Parachute Wings, and 1998 recipient of the American Astronautical Society's Lloyd V. Berkner award for outstanding contributions toward the commercialization of space.
